Reasons for Allowance

1. Claims 1-9 and 12-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

While Burge (U.S. Patent No. 6,774,452) discloses a system for creating customized web pages based on an analysis of data collected regarding a user's navigational history and choices on one or more web sites. The customized web pages are constructed by first retrieving information relating to the web browsing history of particular clients which is stored in one or more databases for populating to the user. Burge does not teach a plurality of unique entry points addressable by each local client computer; and other limitations related to these features in combination with the remaining elements and features of the claimed invention.

And Bernardo (U.S. Patent No. 6,247,032) discloses a software tool for simplifying the creation of Web sites using a plurality of pre-stored templates comprising HTML formatting code, text, fields and formulas. The templates preferably correspond to different types of Web pages and other features commonly found on Web sites plus accept inputs from the user in form of questionnaire for populating the fields in the templates. The tool enable user to generate customized Web pages without writing any HTML or other programming code. Bernardo, however, does not teach the Web sites creation tool running on a remote server computer which includes a plurality of unique entry points addressable by each local client computer for generating unique web pages; and other limitations related to these features in combination with the remaining elements and features of the claimed invention.

Neither of these references taken either alone or in combination discloses a device for automatically generating at least one web page having all the claimed features of applicant's

instant invention, specifically including: running at least one web page generation script on a remote server compute includes plurality of unique entry points addressable by each local client computer for generating unique web pages. Also, there is no motivation to combine the Burge reference with the Bernardo reference to meet these limitations. It is for these reasons that applicant's invention defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
